EDUCATION

B.Tech (Computer Science)
Quantum University, Roorkee

Graduating 2023–2027
8.65 CGPA

TECHNICAL SKILLS

Languages: JavaScript, C++, SQL, C, Python, Java
Backend Development: Node.js, Express.js, REST APIs, WebSocket, Authentication, Authorization, JWT
Frontend Development: React.js, Tailwind CSS, HTML5, CSS3, Responsive Design
Database Management : MongoDB, MySQL, SQL, Data Modeling, Basic AWS (S3, EC2, IAM)
Tools : Git, GitHub, Postman, VS Code, API Documentation
Soft Skills : Team Collaboration, Project Management, Agile Methodology, Communication Skills

WORK EXPERIENCE

- Swarjaya Digital, : Frontend Developer Intern** jun 2025 – sep 2025
- Successfully contributed to 5+ web development projects, delivering responsive and functional applications using modern JavaScript frameworks.
 - Implemented backend features including API integration and data handling for seamless application functionality and Worked with MongoDB for database design, data modeling, and efficient data handling operations.
 - Developed and maintained frontend interfaces with focus on user experience, implementing Figma prototypes and Firebase Authentication for secure user management and access control across multiple applications
- Google Developer Group (GDG), : Core Team Member** Aug 2024 – Aug 2025
- Coordinated and executed multiple technical events and hands-on workshops to promote developer community engagement; conducted knowledge sessions on full-stack development.
 - Led development of the official website of GDG Quantum University using React.js and Tailwind CSS, implementing modular components, responsive user interface, and event tracking features.

ACADEMIC PROJECTS

Smart Pharmacy Management System | MERN Stack

Tech Stack: React.js |Tailwind CSS| Nodejs| Express| MongoDb| firebase | Nodemailer| OpenAI API

- Developed a full-stack pharmacy management platform using MERN stack with dual interfaces - admin dashboard for inventory management (500+ medicines with automated low-stock/expiry alerts, prescription validation, POS billing system) and customer portal for medicine search, online ordering, and health tracking.
- Implemented advanced features including Firebase Authentication for multi-role access control, GPS-based medicine locator for 15-minute availability finder, digital prescription upload with validation workflow, and analytics dashboard with interactive charts (Recharts) displaying sales trends and inventory insights.

She help — Women's Wellness Platform

Tech Stack: React.js |Tailwind CSS| Nodejs| Express| MongoDb| Cloudinary|

- Developed a full-stack web platform focused on women's health, offering features like a cycle tracker, health dashboard, and community support.
- Integrated authentication for doctors and users, enabling personalized health insights and secure consultations.
- Implemented wallet connection and login functionality to promote decentralized data handling and user trust.

CERTIFICATES

- Postman API Fundamentals (Postman), :** July 2025
- Gained practical experience in REST API testing, automation workflows, environment variables, and request chaining using Postman.
- Generative AI Study Jams (Google Developer Groups, Quantum University), :** Nov 2024
- Earned 15+ skill badges via GenAI Arcade labs, gaining exposure to GenAI applications and tooling.
